REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The compositions taught by the closest prior art, Mardiguian (US 6,384,021) comprise heparins that have anti X_a activity of 110 and 120 IU/mg and anti II_a activity of 6 and 8 IU/mg but have mean molecular weights of 3650 and 3616 respectively. This teaching of Mardiguian suggests that in order for the heparin to have an anti X_a activity in the range 110-150 IU/mg the mean molecular weight has to be above 3000. The instant compositions comprise heparin with an anti X_a activity in the range 110-150 IU/mg but with a mean molecular weight in the range 1500-3000. Hence the heparin compositions and the method of preparing the compositions as instantly claimed are neither taught or fairly suggested by the prior art.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
